

Full-service CNC Machine and Fabrication Shop

MACHINING

Our modern CNC machining centers can handle multiple materials and hardness over 60 rockwell. We utilize our decades of experience and up-to-date technology to provide tight tolerance parts.

TURNING

Noble-X, Inc. offers precision cylindrical turning up to a 14" diameter and 32" length. Our Swiss lathes ensure a high level of precision and production paired with a 12' bar feed capacity.

GRINDING

We offer surface grinding, O.D. grinding and grinding of hardened tool steel.

CASTINGS

From concept, to finished part, Noble-X provides precision machined gray and ductile iron castings.

EDM SINKING

For difficult contours, Noble-X offers Electric Discharge Machine services. We have Wire EDM and Graphite EDM machines.

WELDING

Our welding capabilities range from factory maintenance, as in platforms, crossovers and railings to heavy equipment repairs.

STEEL FABRICATION

We can cut, form and weld sheet metal and plate to fabricate parts to your specifications.

BUILDING IMPROVMENTS

We design, fabricate and install staircases, railings, catwalks, mezzanines and more.

MILLING

Our milling capability is up to 14 ft. To speed up production, we can mill and turn simultaneously.

BROACHING

Noble-X, Inc. can help with your high-volume broaching job.

FIXTURING

We help customers find a solution for their complicated fixturing projects, including difficult-to-hold parts.

HEAT TREATING

We heat treat prototypes and small runs. As a full-service CNC machine shop, we partner with local heat treaters for larger jobs to provide finished parts.

3D METAL PRINTING SERVICE

We provide 3D printed parts in production quality metal. Send us your STL file for a faster quote.

INSPECTION

We offer full inspection services with a programmable CMM (Coordinate Measuring Machine) for tolerances of +/- .0002".

DESIGN & ENGINEERING

Our in-house team of production designers and engineers are here to work with you to take your idea from drawing to a fully functioning product.

ADDITIONAL SERVICES

We coordinate other processes, such as high-volume heat treating, coating and engraving.
